Index to Volume 21
Subject Index

Academic administration
  development of case statements in, 84–88
Academic integrity
  case study of ethical conduct in the academic setting, 89–96
Accreditation
  activities of CCNE, role of registered nurses, 191–196
Aesthetic knowledge
  enhancing nursing students' clinical experiences using, 66–71
Alternative educational strategy
  enhancing nursing students' clinical experiences using aesthetics, 66–71
American Nurses Association
  Code of Ethics, application in genetics, 103–113
Asian immigrant populations
  issues of instrument translation in research on, 231–239
Assessment skills
  physical, descriptive study of what is taught and what is practiced, 114–118
Asthma
  clinical management of, use of interdisciplinary simulation to understand perceptions of team members' roles in, 159–166
Autonomy
  ethics of heparin administration to the potential non-heart-beating organ donor, 97–102

Baccalaureate degree programs
  building foundation for evidence-based practice by teaching basic concepts to undergraduate freshman students, 351–357
  collaborative approach to expand clinical experiences and cultural awareness among undergraduate nursing students, 240–243
  cost of doing business in nursing education, 183–190
  enhancing clinical experiences using aesthetics, 66–71
  gerontological nursing content in, comparison of findings from 1997 and 2003, 268–275
  physical assessment skills in, descriptive study of what is taught and what is practiced, 114–118
  RN-BSN distance education experience, 283–292
  teaching core nursing values, 46–51
  teaching effectiveness of clinical nursing faculty, perceptions of full- and part- time basic BSN, LPN-BSN and RN-BSN nursing students, 32–45
Benchmarking
  best practices in web-based courses, generational differences across undergraduate and graduate students, 126–133
Beneficence
  ethics of heparin administration to the potential non-heart-beating organ donor, 97–102
Best practices
  in web-based courses, generational differences across undergraduate and graduate students, 126–133

Career development
  opportunities for, role of registered nurses in accreditation activities of CCNE, 191–196
Caregiving
  and culture, 139–140
Care perspective
  case study of ethical conduct in the academic setting, 89–96
Caring
  and core nursing values, teaching of, 46–51
Case statement
  development in academic administration, 84–88
CD-ROM
  interdisciplinary simulation using, to understand perceptions of team members' roles in management of asthma, 159–166
Clinical experiences
  collaborative approach to expand cultural awareness and, among undergraduate nursing students, 240–243
  of nursing students, enhanced by aesthetic knowledge, 66–71
  students' reflections on, in preparation for practice, 293–302
Clinical learning log
  writing for self-discovery, 52–58
Clinical nurse leader
  advances in graduate education, the need to go beyond the clinical role, 119–125
Clinical practice
  ethics of heparin administration to the potential non-heart-beating organ donor, 97–102
  physical assessment skills in, descriptive study of what is taught and what is practiced, 114–118
  reconciling cultural relativism in, 330–331 *(Editorial)*
  students' reflections on their final clinical experience in preparation for, 293–302
Clinical Prevention and Population Health Curriculum Framework
  nursing perspective, 259–267
Clinical scholarship
  shifting nursing culture toward, promoting evidence-based practice in clinical setting, 372–379
Clinical teaching
  effectiveness of, as perceived by full- and part-time basic BSN, LPN-BSN and RN-BSN nursing students, 32–45
Code of ethics
  of *American Nurses Association,* application in genetics, 103–113
Collaboration
  alleviating health disparities through, 197–198 *(Editorial)*
  to expand clinical experiences and cultural awareness among undergraduate nursing students, 240–243
Commission on Collegiate Nursing Education (CCNE)
  role of registered nurses in accreditation activities of, 191–196
Communication
  development of case statements in academic administration, 84–88
Community-based nursing education
  innovations in, 167–174
Community-based participatory research
  to address health disparities in Latino community, 199–209
  with Latino community members, 210–215

Competency
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
Concept mapping
as assessment tool in nursing course, 141–149
Confidentiality
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
Copyright
licensing web-based nursing programs, courses, and course materials, 276–282
Costs
of doing business in nursing education, 183–190
Critical thinking
importance in evidence-based practice, 364–371
Cross-cultural research
on Asian immigrant populations, issues of instrument translation in, 231–239
Cultural attitudes
and knowledge, and skills, of nursing faculty toward patients from four diverse cultures, 175–182
Cultural awareness
collaborative approach to expand clinical experiences and, among undergraduate nursing students, 240–243
Cultural competence
and knowledge, and skills, of nursing faculty toward patients from four diverse cultures, 175–182
Cultural diversity
"caregiving" is cultural, 139–140
Cultural relativism
reconciling in clinical practice, 330–331 *(Editorial)*
Culture
cultural attitudes, knowledge, and skills of nursing faculty toward patients from four diverse cultures, 175–182
Curriculum
building foundation for evidence-based practice by teaching basic concepts to undergraduate freshman students, 351–357
Clinical Prevention and Population Health Curriculum Framework: the nursing perspective, 259–267
developing research competence to support evidence-based practice, 358–363
in evidence-based practice, information resources and role of librarians in development of, 380–387
gerontological nursing content in baccalaureate nursing programs, comparison of findings from 1997 and 2003, 268–275
innovations in community-based nursing education, 167–174
integrating evidence-based practice into nursing education, 327–328 *(Editorial)*
teaching core nursing values, 46–51

Distance education
RN-BSN program, 283–292
Doctoral degree programs
relational analysis of doctorate-prepared nurse-scholars' first 5 years after graduation, 303–313
strategies for developing a successful proposal submitted to National Research Service Award, 23–31

Ecological models
use in research on health disparities, 216–222
Education, nursing
advances in graduate education, the need to go beyond clinical role, 119–125
assessment by nursing students, 150–158
best practices in web-based courses, generational differences across undergraduate and graduate students, 126–133
building foundation for evidence-based practice by teaching basic concepts to undergraduate freshman students, 351–357
case study of ethical conduct in the academic setting, 89–96
collaborative approach to expand clinical experiences and cultural awareness among undergraduate nursing students, 240–243
community-based, innovations in, 167–174
concept maps as assessment tool in, 141–149
cost of doing business in, 183–190
curricula, integration of evidence-based practice into, 327–328 *(Editorial)*
educating for evidence-based practice, 345–350
effect of faculty shortage on development of nursing profession, 9–15
enhancing clinical experiences using aesthetics, 66–71
evolution of university-wide school of nursing, 16–22
gerontological nursing content in baccalaureate nursing programs, comparison of findings from 1997 and 2003, 268–275
importance of critical thinking in evidence-based practice, 364–371
licensing web-based nursing programs, courses, and course materials, 276–282
moving evidence-based practice into, 329 *(Editorial)*
physical assessment skills in, descriptive study of what is taught and what is practiced, 114–118
RN-BSN distance education experience, 283–292
strategies for developing a successful proposal submitted to National Research Service Award, 23–31
teaching core nursing values, 46–51
teaching effectiveness of clinical nursing faculty, perceptions of full- and part- time basic BSN, LPN-BSN and RN-BSN nursing students, 32–45
use of interdisciplinary simulation to understand perceptions of team members' roles in management of asthma, 159–166
Web-based teaching with technologies course, 59–65
Educational technology
Web-based teaching with technologies course, 59–65
Educator, nurse
Wed-based teaching with technologies course, 59–65
Electronic manuscript
submissions and reviews *(Editorial)*, 253–254
Endowments
on chairs and professorships in schools of nursing, 244–252
Ethical conduct
of research as visiting scientist in women's prison, 223–230
Ethical issues
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
case study of ethical conduct in the academic setting, 89–96
heparin administration to the potential non-heart-beating organ donor, 97–102

Evaluation
in graduate nursing education program, hardiness as predictor of success among nursing administration students, 314–321
Evidence-based practice
advancement in 21st century, 335–344
building foundation for, teaching basic concepts to undergraduate freshman students, 351–357
developing research competence in support of, 358–363
educating for, 345–350
importance of critical thinking in, 364–371
information resources and role of librarians in development of curricula in, 380–387
integration into educational curricula, 327–328 *(Editorial)*
moving into nursing education, 329 *(Editorial)*
promoting in clinical setting, shifting nursing culture toward clinical scholarship, 372–379

Faculty practice
case study of ethical conduct in the academic setting, 89–96
cultural attitudes, knowledge, and skills of nursing faculty toward patients from four diverse cultures, 175–182
effect of faculty shortage on development of nursing profession, 9–15
teaching effectiveness of clinical nursing faculty, perceptions of full- and part- time basic BSN, LPN-BSN and RN-BSN nursing students, 32–45
Faculty sponsor
strategies for developing a successful proposal submitted to National Research Service Award, 23–31
Faculty transition
innovations in community-based nursing education, 167–174
Female prisoners
research among, conducted as visiting scientist, 223–230
Filipino population
issues of instrument translation in research on, 231–239

Generational differences
across undergraduate and graduate students, best practices in web-based courses, 126–133
Genetics
applying the *American Nurses Association's Code of Ethics* in, 103–113
Geriatrics
gerontological nursing content in baccalaureate nursing programs, comparison of findings from 1997 and 2003, 268–275
Gerontological nursing
content in baccalaureate nursing programs, comparison of findings from 1997 and 2003, 268–275
Graduate degree programs
advances in, the need to go beyond the clinical role, 119–125
program evaluation in, hardiness as predictor of success among nursing administration students, 314–321

Habits of mind
importance of critical thinking in evidence-based practice, 364–371
Hardiness
as predictor of success among nursing administration students, program evaluation in graduate nursing education, 314–321
Health care
advancing evidence-based practice in 21st century, 335–344
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
Health disparities
alleviation through collaboration, 197–198 *(Editorial)*
in Latino community, addressed through community-partnered participatory research, 199–209
using ecological models in research on, 216–222
Health promotion/prevention
Clinical Prevention and Population Health Curriculum Framework: the nursing perspective, 259–267
Healthy People 2010
Clinical Prevention and Population Health Curriculum Framework: the nursing perspective, 259–267
Heparin administration
to the potential non-heart-beating organ donor, ethics of, 97–102
History, nursing ethics
case study of ethical conduct in the academic setting, 89–96

Ilocano population
issues of instrument translation in research on, 231–239
Incarceration
conducting research as visiting scientist in women's prison, 223–230
Indiana University School of Nursing
evolution into a multicampus school, 16–22
Informed consent
ethics of heparin administration to the potential non-heart-beating organ donor, 97–102
Innovation
in community-based nursing education, 167–174
role of registered nurses in CCNE accreditation activities, 191–196
Institutional development
stages of, evolution of university-wide school of nursing, 16–22
Instrument translation
issues in research on Asian immigrant populations, 231–239
Intellectual property
licensing web-based nursing programs, courses, and course materials, 276–282
Interdisciplinary education
in understanding perceptions of team members' roles in management of asthma, 159–166
Interdisciplinary research
and multidisciplinary and transdisciplinary research teams, meaning of terms, 332–334 *(Editorial)*
Interim administration
choosing or becoming an interim administrator, 322–326
Inter-professional prevention and population health
Clinical Prevention and Population Health Curriculum Framework: the nursing perspective, 259–267

Job satisfaction
role of registered nurses in CCNE accreditation activities, 191–196
Johnson & Johnson campaign
awareness of, and impact on decision to select a career in nursing among newly enrolled students, 75–83
Journal of Professional Nursing
alleviating health disparities through collaboration, 197–198 *(Editorial)*

Journal of Professional Nursing (continued)
electronic manuscript submissions and reviews *(Editorial)*, 253–254
integrating evidence-based practice into educational curricula and writing for the last issue, 327–328
being mindful: living each day in a hectic world *(Editorial)*, 1–2
moving evidence-based practice into nursing education, 329 *(Editorial)*
multidisciplinary, interdisciplinary and transdisciplinary research teams, 332–334 *(Editorial)*
nursing research in context of awe and wonder, 135–136 *(Editorial)*
process of writing and publishing *(Guest editorial)*, 73–74
reconciling cultural relativism for clinical paradigm, 330–331 *(Editorial)*
Justice
ethics of heparin administration to the potential non-heart-beating organ donor, 97–102

Knowledge development
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
Korean population
issues of instrument translation in research on, 231–239

Latino community
members of, community-based participatory research with, 210–215
use of community-partnered participatory research to address health disparities in, 199–209
Lay health advisors
in community-partnered participatory research to address health disparities in Latino community, 199–209
Leadership
choosing or becoming an interim administrator, 322–326
Librarians
and information resources, role in development of evidence-based practice curricula, 380–387
Licensing
web-based nursing programs, courses, and course materials, 276–282

Manuscript
electronic, submissions and reviews *(Editorial)*, 253–254
Mentoring
relational analysis of doctorate-prepared nurse-scholars' first 5 years after graduation, 303–313
Multidisciplinary research
and interdisciplinary and transdisciplinary research teams, meaning of terms, 332–334 *(Editorial)*
Multisite collaboration
evolution of Indiana University School of Nursing into a multicampus school, 16–22

Narrative reflection
of students on their final clinical experience in preparation for practice, 293–302
National Research Service Award
strategies for developing a successful proposal, 23–31
Nurses
political involvement of, 5–8
reconciling cultural relativism in clinical practice, 330–331 *(Editorial)*
Nursing
toward clinical scholarship: promoting evidence-based practice in clinical setting, 372–379
developing research competence to support evidence-based practice, 358–363
educating for evidence-based practice, 345–350
gerontological, content in baccalaureate nursing programs, comparison of findings from 1997 and 2003, 268–275
perceptions of a career in, and impact of Johnson & Johnson campaign in pursuing a nursing profession, 75–83
profession at risk, 9–15
Nursing administration
students, hardiness as predictor of success among, program evaluation in graduate nursing education, 314–321
Nursing administration and preceptorship
writing as a self-discovery tool, 52–58
Nursing faculty
cultural attitudes, knowledge, and skills toward patients from four diverse cultures, 175–182

Online education
licensing web-based nursing programs, courses, and course materials, 276–282
Online teaching
students' reflections on their final clinical experience in preparation for practice, 293–302
Organ donation
ethics of heparin administration to the potential non-heart-beating organ donor, 97–102
Organizational change
toward clinical scholarship: promoting evidence-based practice in clinical setting, 372–379
Organizational effectiveness
evolution of university-wide school of nursing, 16–22

Patient advocacy
nurses' involvement in politics, 5–8
Physical assessment
descriptive study of what is taught and what is practiced, 114–118
Political involvement
of nurses, 5–8
Political role
of nurses, 5–8
Population health
advances in graduate education, the need to go beyond the clinical role, 119–125
Practice, nursing
clinical, *see* Clinical practice
evidence-based, *see* Evidence-based practice
faculty, *see* Faculty practice
professional, *see* Professional practice
Privacy
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
Process models
advancing evidence-based practice in 21st century, 335–344

Professional growth
RN-BSN distance education experience, 283–292
Professional practice
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113
Professional responsibility
vs. privilege, political involvement of nurses, 5–8
Professional values
teaching of, 46–51
Professorships
and chairs, in schools of nursing, endowments on, 244–252
Program assessment
in graduate nursing education, hardiness as predictor of success among nursing administration students, 314–321
relational analysis of doctorate-prepared nurse-scholars' first 5 years after graduation, 303–313
Proposal writing
strategies for, submitted to National Research Service Award, 23–31
Publication
writing for *(Guest editorial)*, 73–74

Qualitative research
use of interdisciplinary simulation to understand perceptions of team members' role in management of asthma, 159–166

Reflection
of students on their final clinical experience in preparation for practice, 293–302
Research, nursing
community-based participatory
to address health disparities in Latino community, 199–209
with Latino community members, 210–215
conducting research as visiting scientist in women's prison, 223–230
in context of awe and wonder, 135–136 *(Editorial)*
on health disparities, using ecological models, 216–222
issues of instrument translation on Asian immigrant populations, 231–239
multidisciplinary, interdisciplinary and transdisciplinary research teams, 332–334 *(Editorial)*
role in advancement of nursing profession, 9–15
Research-based evidence
evidence-based resources and role of librarians in development of evidence-based practice curricula, 380–387
Research competencies
development of, to support evidence-based practice, 358–363
Research proposal
strategies for writing of, submitted to National Research Service Award, 23–31
Research utilization
building foundation for evidence-based practice by teaching basic concepts to undergraduate freshman students, 351–357
importance of critical thinking in evidence-based practice, 364–371
Retention
role of registered nurses in CCNE accreditation activities, 191–196
Roy's model
evaluation of nursing students' learning progress through construction of concept maps based on scenarios, 141–149

Satisfaction and rewards
assessment of nursing education by nursing students, 150–158
Scenarios
evaluation of nursing students' learning progress through construction of concept maps based on, 141–149
Scholarly identity development
relational analysis of doctorate-prepared nurse-scholars' first 5 years after graduation, 303–313
Scholarship
role in advancement of nursing profession, 9–15
Schools of nursing
endowed chairs and professorships in, 244–252
Self-discovery
writing for, 52–58
Shortage, in nursing workforce
and cost of doing business in nursing education, 183–190
effect of faculty shortage on development of nursing profession, 9–15
Stress
as predictor of success among nursing administration students, program evaluation in graduate nursing education, 314–321
Students, nursing
administration, program evaluation in graduate nursing education, hardiness as predictor of success among, 314–321
assessment of nursing education by, 150–158
best practices in web-based courses for, generational differences across undergraduate and graduate students, 126–133
case study of ethical conduct in the academic setting, 89–96
cost of delivering education to, 183–190
decision to enroll in nursing education program, and awareness and impact of Johnson & Johnson campaign, 75–83
enhancing clinical experiences using aesthetics, 66–71
evaluation of learning progress through construction of concept maps based on scenarios, 141–149
full- and part- time basic BSN, LPN-BSN and RN-BSN, perceptions of effective clinical teaching, 32–45
perceptions of a career in nursing and the nursing shortage, 75–83
perceptions of team members' roles in management of asthma, use of interdisciplinary simulation, 159–166
reflections on their final clinical experience in preparation for practice, 293–302
RN-BSN distance education experience, 283–292
undergraduate, collaborative approach to expand clinical experiences and cultural awareness among, 240–243
undergraduate freshmen, building foundation for evidence-based practice by teaching basic concepts to, 351–357

Teaching strategies
collaborative approach to expand clinical experiences and cultural awareness among undergraduate nursing students, 240–243

Technology
electronic manuscript submissions and reviews *(Editorial)*, 253–254
Technology transfer
licensing web-based nursing programs, courses, and course materials, 276–282
Transcultural care
cultural attitudes, knowledge, and skills of nursing faculty toward patients from four diverse cultures, 175–182
Transdisciplinary research
and multidisciplinary and interdisciplinary research teams, meaning of terms, 332–334 *(Editorial)*
Transition, into clinical practice
students' reflections on their final clinical experience in preparation for practice, 293–302

Undergraduate degree programs
building foundation for evidence-based practice by teaching basic concepts to undergraduate freshman students, 351–357
collaborative approach to expand clinical experiences and cultural awareness among undergraduate nursing students, 240–243
University-wide school of nursing
evolution into a multicampus school, 16–22
Values
applying the *American Nurses Association's Code of Ethics* in genetics, 103–113

Web-based courses
best practices in, generational differences across undergraduate and graduate nursing students, 126–133
and nursing programs, and course materials, licensing of, 276–282
Web-based education
teaching with technologies, 59–65
Women's issues
relational analysis of doctorate-prepared nurse-scholars' first 5 years after graduation, 303–313
Workforce shortage, in nursing
and cost of doing business in nursing education, 183–190
effect of faculty shortage on development of nursing profession, 9–15
Writing
for publication *(Guest editorial)*, 73–74
for self-discovery, 52–58
